CORE & TECHNICAL SKILLS

Cybersecurity

- Threat Detection
- Vulnerability Assessment
- Penetration Testing
- Ethical Hacking
- Network Security
- Web Application Security
- Security Monitoring
- Incident Response
- Risk Assessment
- Phishing Analysis
- Security Awareness
- OWASP Top 10

Security Tools

- Kali Linux
- Nmap
- Wireshark
- Burp Suite
- Cisco Packet Tracer

Programming

- Python
- SQL
- HTML/CSS
- JavaScript
- Numpy
- Pandas

PROFESSIONAL SUMMARY

Cybersecurity graduate (B.Sc., Second Class Upper) with hands-on exposure to vulnerability assessment, threat detection, incident response, penetration testing, and security analysis through internships, industry job simulations, and practical projects. Experienced in developing AI-based cybersecurity solutions, including AI-powered Email Phishing Detection System and a CNN-based SQL Injection Detection System. Skilled in network security, web application security, and the OWASP Top 10, using tools including Kali Linux, Nmap, Wireshark, and Burp Suite. ISC2 Certified in Cybersecurity (CC) and Cisco-certified in Ethical Hacking and Networking. Strong analytical and reporting skills, seeking an entry-level SOC Analyst / Penetration Tester role to apply attack-and-defense fundamentals in a live security operations environment.

EDUCATION

Bachelor of Science (B.Sc.) in Cyber Security
Redeemer's University, Ede, Osun State
Second Class Upper (2:1)
Graduated: 2026

PROFESSIONAL EXPERIENCE

Tata Cybersecurity Analyst Job Simulation, FORAGE (August 2024)

- Collaborated with a Cybersecurity Consulting team on Identity and Access Management (IAM)
- Applied IAM principles and cybersecurity best practices to business scenarios.
- Produced technical documentation and presentation for stakeholders.

MasterCard Cybersecurity Virtual Experience, FORAGE (August 2024)

- Investigated Phishing threats and security awareness challenges.
- Identified departments requiring targeted security training.
- Recommended awareness initiatives and security procedures.

AIG Shields Up Cyber Defense Simulation, FORAGE (May 2025)

- Researched vulnerabilities using CISA guidance.
- Developed remediation recommendations.

Frameworks & Technologies

- Linux
- Flask
- TensorFlow
- MySQL
- Chart.js

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Attention to Details
- Communication
- Adaptability
- Teamwork
- Time Management
- Continuous Learning

CERTIFICATIONS

- Cisco Networking Academy – Cisco Packet Tracer (2024)
- Cisco Networking Academy – Introduction to Cybersecurity (2024)
- Cisco Networking Academy – Ethical Hacking (2024)
- Cisco networking Academy – Networking Basics (2024)
- ISC2 Certified in Cybersecurity (CC) – Course & Domain Certificates (2025)
- Cisco Networking Academy – Networking Devices and Initial Configuration (2025)

- Created a python script supporting a cybersecurity scenario.

Standard Bank Risk Management Simulation, FORAGE (May 2025)

- Evaluated organizational risk controls.
- Built a risk matrix.
- Presented recommendation to senior stakeholders.

British Airways Data Science Job Simulation, FORAGE (May 2025)

- Completed a simulation focusing on how data science is a critical component of British Airways' success.
- Scraped and analyzed customer review data to uncover findings.
- Built a predictive model to understand factors that influence buying behavior.

International Exchange Program to the United States of America (June – September, 2025)

- Completed part of my industrial training through an international exchange program.
- Worked in multicultural professional environment.
- Developed adaptability, collaboration and international professional exposure.

IT Intern at Lofty Global System, Lagos (September – October, 2025)

- Provided technical support for hardware, software and networking issues.
- Participated in several network analysis assignments.
- Assisted with system configuration, maintenance and troubleshooting.
- Strengthened practical cybersecurity and infrastructure knowledge.

FEATURED PROJECTS

AI-Based SQL Injection Detection System (Final Year Project)

- Developed a Convolutional Neural Network (CNN) to classify SQL injection attacks.
- Preprocessed and balanced a large SQL dataset for model training and evaluation.
- Built a Flask web application for real-time SQL query analysis and attack classification.
- Technologies: Python, TensorFlow, Flask, Pandas, NumPy, HTML, CSS, JavaScript.

PhishGuard AI: AI-Powered Email Phishing Detection System

- Developed an AI-powered system using a Hybrid Convolutional Neural Network (CNN) to classify emails as legitimate or phishing.
- Implemented email preprocessing, phishing detection, confidence scoring, risk assessment, and detection explanations.
- Achieved **98.54% accuracy, 97.66% precision, 99.25% recall, and 98.45% F1-score** on 5,129 test samples.
- Built a flask-based web application with interactive visualizations for real-time email threat analysis.
- Technologies: Python TensorFlow, Flask, Pandas, Numpy, HTML, CSS, JavaScript.
